

Health & Safety

'In The Docks' Mock Trial

Gross Negligence Manslaughter

JANUARY 2025

Protecting and keeping people safe is an essential part of any laundry's operations.

There are significant consequences, from compensation and regulatory enforcement action to criminal fines, for those who do not meet the required duties. To help businesses understand the challenges, we are working with **WTW** who have created a number of mock trials. This innovative training improves H&S governance and compliance standards whilst enhancing an organisation's ability to avoid or defend both regulatory action and civil compensation claims.

OVERVIEW

The Mock Trial focuses on the personal prosecution of a director after an employee is fatally injured at work. Specialist, practicing barristers will act as the advocates for the Prosecution and Defence, with the case being heard by a genuine Crown Court Recorder to ensure that the training is as realistic as possible.

The evidence is also unscripted to give the case and Mock Trial an authentic feel. The Mock Trial is also unscripted, to create an authentic feel and includes specialist, practicing barristers as the advocates for the prosecution and defense.

TIMES & LOCATION Tuesday 21st January 2025 at Crowne Plaza NEC, Birmingham.

FEE £100+VAT per person for members, £200 +VAT per person for non-members.

WHO SHOULD ATTEND

Those involved in all aspects of H&S strategies, including Directors and Senior Leadership Teams of Operations, Finance, Insurance, HR and H&S.

Due to an increase in the amount of fines and prosecutions from the HSE, it's more important than ever for organisations to evidence they have effective H&S management systems in place.

GAIN UNDERSTANDING AND AWARENESS OF

- Systems and procedures guidance and enforcement changes
- H&S governance and compliance
- Regulatory challenges, criminal prosecutions, civil compensation claims and UK court system jurisdictions
- Correct contractor selection, engagement and management
- Record keeping and Performance review
