

ISO 14001 IMPLEMENTATION TRAINING

REDUCE WASTE & PROTECT OUR ENVIRONMENT

Online **16 SEPTEMBER 2024**

ISO 14001 is an effective and popular Environmental Management System (EMS) Standard, providing an internationally recognised structure for creating and maintaining an effective EMS.

OVERVIEW

Laundry processes already contribute immensely to the reduction of single-use waste and achieve impressive levels of efficiencies. However, is there more we can be doing in our laundries? Understanding the ISO 14001 standard will enable you to do more for your organisation and for the planet. Certification will help you address your environmental concerns, reduce waste, save money and strengthen your reputation.

The aim of this course is to give you the knowledge and confidence required to understand how to implement an Environmental Management System that meets the requirements of ISO 14001.

You'll come away from the course knowing what needs to be done to achieve compliance with ISO 14001 standard.

The course will be held online. An invite will be emailed with the necessary links to join.

WHO SHOULD JOIN

The course is aimed at all levels of the laundry workforce but is especially advantageous for quality, production, logistics and operational teams.

DATE AND TIME

The course runs from 9.30am-4pm (including breaks) on the **16th September 2024.**

COSTS

TSA members: £150+VAT, Non-members: £300+VAT
