

Health & Safety

'In The Docks' Workshop

Personal Prosecution **JANUARY 2023**

Protecting and keeping people safe is an essential part of any laundry's operations.

There are significant consequences, from compensation and regulatory enforcement action to criminal fines, for those who do not meet the required duties. To help businesses understand the challenges, we are working with **Willis Towers Watson** who have created various mock trials. This innovative training improves H&S governance and compliance standards whilst enhancing an organisation's ability to avoid or defend both regulatory action and civil compensation claims.

OVERVIEW

The aim is to provide attendees with an understanding of the factors that can lead to H&S civil compensation claims or regulatory enforcement action. Mock trial training blends seminar-based learning with audio-visual footage. The trials are heard by real Crown Court Recorders and prosecuted and defended by specialist practising barristers. The evidence is unscripted to ensure the mock trials are realistic and authentic.

All trial training sessions offer Continuing Professional Development points. They detail what duties an organisation must meet and explains how the civil and regulatory court systems differ in terms of process, legal burdens of proof, evidential weight and the admissibility of evidence.

TIMES & LOCATION Tuesday 10th January 2023, in Birmingham, venue TBC.

FEE £100+VAT pp for members, £200+VAT for non-members.

WHO SHOULD ATTEND

Those involved in all aspects of H&S strategies, including Directors and Senior Leadership Teams of Operations, Finance, Insurance, HR and H&S.

Due to an increase in the amount of fines and prosecutions from the HSE, it's more important than ever for organisations to evidence they have effective H&S management systems in place.

GAIN EXPERIENCE AND KNOWLEDGE OF

- What leads to regulatory enforcement action against a person or organisation who has responsibility or control of H&S
- The legalities that must be complied with and the consequences of a breach
- The importance of evidence and how it can influence the court
- How accident investigations can affect a defence or witness's credibility
- Witness's performance and the pressures they experience
- Best practice to avoid or defend against regulatory action.

NEXT STEPS To register your, or your colleagues, place on this course please get in contact by email on events@tsa-uk.org along with your details.
